Efficient compressed air systems & service

Kaeser Compressors offer a large range of screw compressors, blowers, refrigerated dryers and air treatment equipment from 0.3 - 80m³/min (11 - 2800cfm) with pressures from 7.5 - 13 Bar (108 - 190 psi). The Kaeser range incorporates the Sigma Profile air end and Sigma Control together with high quality engineering and is able to provide significant whole of life cost savings for compressed air installations.

In addition, Kaeser have a large range of diesel powered mobile compressors ideal for the construction, hire and other industries.

Early in 2001 Airdraulics were taken onboard as a Kaeser “Partner” and appointed as a “AAA” Distributor and Service centre.

Not only are we able to help with the design of a compressed air system, we also have accredited specialists to install and service complete compressed air systems.

For further assistance please contact us.
